

MEDICAL GRADE GAS SOLUTIONS

DESIGNED SPECIFICALLY FOR SECHRIST H-SERIES MONOPLACE HYPERBARIC CHAMBERS

Sechrist Industries is proud to expand our hyperbaric support services to include recommendation, selection, coordination, installation, and servicing of Medical Grade Gas systems tailored to the needs of Sechrist H-Series chambers.

Whether you are adding new chambers or seeking cost-effective alternatives to a bulk gas supply, our expert team ensures your medical grade gas system meets all NFPA99, UHMS Accreditation, and Joint Commission Hyperbaric Survey criteria.

END-TO-END SERVICE

From planning to performance, Sechrist provides:

- System Selection and equipment sourcing
- Installation coordination and technical oversight*
- Annual preventive service and maintenance scheduling*

Integrated oxygen/air delivery solutions
Let us help you transition to a streamlined, code-compliant Medical Gas delivery system built for hyperbaric therapy success.

* Installation & Service for USA only; outside USA, contact your local Sechrist distributor for additional assistance.

TAILORED DESIGN & COMPLIANCE

Each Medical Grade Gas system is carefully selected based on your facility's layout and operational demands. We work with you to:

- Evaluate and recommend the best Medical Gas solution for your site.
- Provide complete oversight through installation, certification, and maintenance.
- Ensure compatibility with your Sechrist Monoplace Hyperbaric Chambers.
- Compression Systems specifically packaged based on quantity and model of Sechrist Monoplace Hyperbaric Chamber.
