

# SECHRIST HYPERBARIC IV EXTENSION SETS

Sechrist Industries proudly presents the advanced IV Pass-Thru Kit, designed specifically for seamless and safe IV therapy in hyperbaric environments. This innovative kit includes all essential components, ensuring reliable functionality under pressures up to 3 ATA, making it ideal for Sechrist Monoplace Hyperbaric Chambers. Engineered with precision and backed by Sechrist's commitment to quality, the IV Pass-Thru Kit addresses the challenges of IV therapy delivery in pressurized settings.

## Key Features:

- **Comprehensive Kit:** Includes silicone IV pass-thru adapters, extension sets, stopcocks, and backcheck valves for versatile application. All pieces are disposable and one-time use for user convenience.
  - **Reliable Performance:** Meets safety and functionality standards for hyperbaric chamber use.
  - **Simplified Workflow:** Designed for easy setup, minimizing disruption during patient treatment.
- Ensure your facility is equipped for safe and effective hyperbaric IV therapy with Sechrist's trusted solutions. Contact us today to place your order or learn more!
